DIABETES MELLITUS:		YES	NO	SMOKER:	YES	NO	FORMER
CHOLESTEROL LOWERING MEDICATIONS (e.g. STATINS):		YES	NO	CHRONIC MEDICATIONS:			
(x)	TESTS (Mark test/s required with X)			SAMPLE TYPE	CODE	COST (incl. VAT)	
	FOOD IgG TESTING		IgG Food Test	1X SST TUBE (5ml)		R 3 950,00	
	IgE ALLERGY TEST - complete		Food and Inhalant Allergy Test	1X SST TUBE (5ml)		R 3 950,00	
	LIPIDPRO - LDL subfraction test		Comprehensive analysis of LDL- cholesterol fractions & subfractions	1X SST TUBE (5ml)		R 1 950,00	
	LACTOSE INTOLERANCE		Genetic test for lactase deficiency - single nucleotide polymorphism in the MCM6 gene	1X EDTA TUBE (5ml)		R 900,00	
	CELIAC DISEASE		Genetic test for HLA-DQ2/DQ8 markers	1X EDTA TUBE (5ml)		R 1 900,00	
SAMPLE COLLECTION DETAILS (for person taking the sample)							
SAMPLE TYPE:		SST	EDTA	COLLECTION DATE:		BLOOD SAMPLE TAKEN BY: Name	
<small>Tick sample type</small>							
INFORMED CONSENT AND TERMS AND CONDITIONS FOR TESTING							
<b>General:</b> I consent to tests requested, guarantee payment and verify that all information is correct. Payment for the test requested will be taken as consent for testing to be performed on the sample submitted to MDS. I accept it is my responsibility to check if I can claim for the test/s from my Medical Aid							
<b>Informed consent for testing:</b> While it is in my best interest to have a healthcare practitioner interpret and explain my results to me, I understand that should I wish to receive my results directly, I acknowledge that MDS cannot be held liable for any pain, discomfort, confusion or distress which the release of the test results to me, may cause. Furthermore, whilst I am legally entitled to my own information, I understand that it might not necessarily be in my best interest to be exposed to information of which I may have limited knowledge and understanding and which may be detrimental to my well-being if not explained fully and in a manner which I will understand, by my own trusted healthcare practitioner. As I have made an informed decision to self-refer to MDS for testing, by giving me the test results, MDS waives liability for any distress or confusion which I may experience as a result of receiving the test result directly from MDS without consulting with a healthcare practitioner. I acknowledge that MDS strongly recommends that I be encouraged to visit my healthcare practitioner as soon as possible after receiving my results and that I carry the onus to make an appointment with my healthcare practitioner to have my test results interpreted.							
<b>Limitations of the method:</b> The results obtained must always be interpreted in combination with the complete clinical picture and dietary changes must be made in consultation with a relevant dietician or nutritional expert. The IgG levels determined by using this test system make it possible to infer information about the degree of sensitization of the patient to the food antigens or mixtures tested. They cannot be used to derive a relationship between the determined IgG concentration and occurrence of serious clinical symptoms. False positive test results may be produced by cross-reactivity of the antigens being tested with the epitopes of other antigens. Certain allergy associations do not support IgG testing as a means to diagnose food hypersensitivities. However, there are publications and anecdotal evidence that support that elimination diets based on circulating IgG antibodies can result in improved symptoms in patient.							
CONSENT:		YES	NO	SIGNATURE:		DATE:	
INSTRUCTIONS FOR SAMPLE COLLECTION AND TRANSPORTATION TO MDS LABORATORY							
Sample transport requirements:		Please ensure MDS receives the sample within 24-36 hours of sample collection. Collections MONDAY-THURSDAY (NOT before a public holiday). Samples stored at 4-8°C
